

INNOVATION LIVING™

Expand Your Living Space

**Revivus**

Eco-friendly & space  
saving multifunction

Make your bed and prepare yourself for a pleasant sleep.

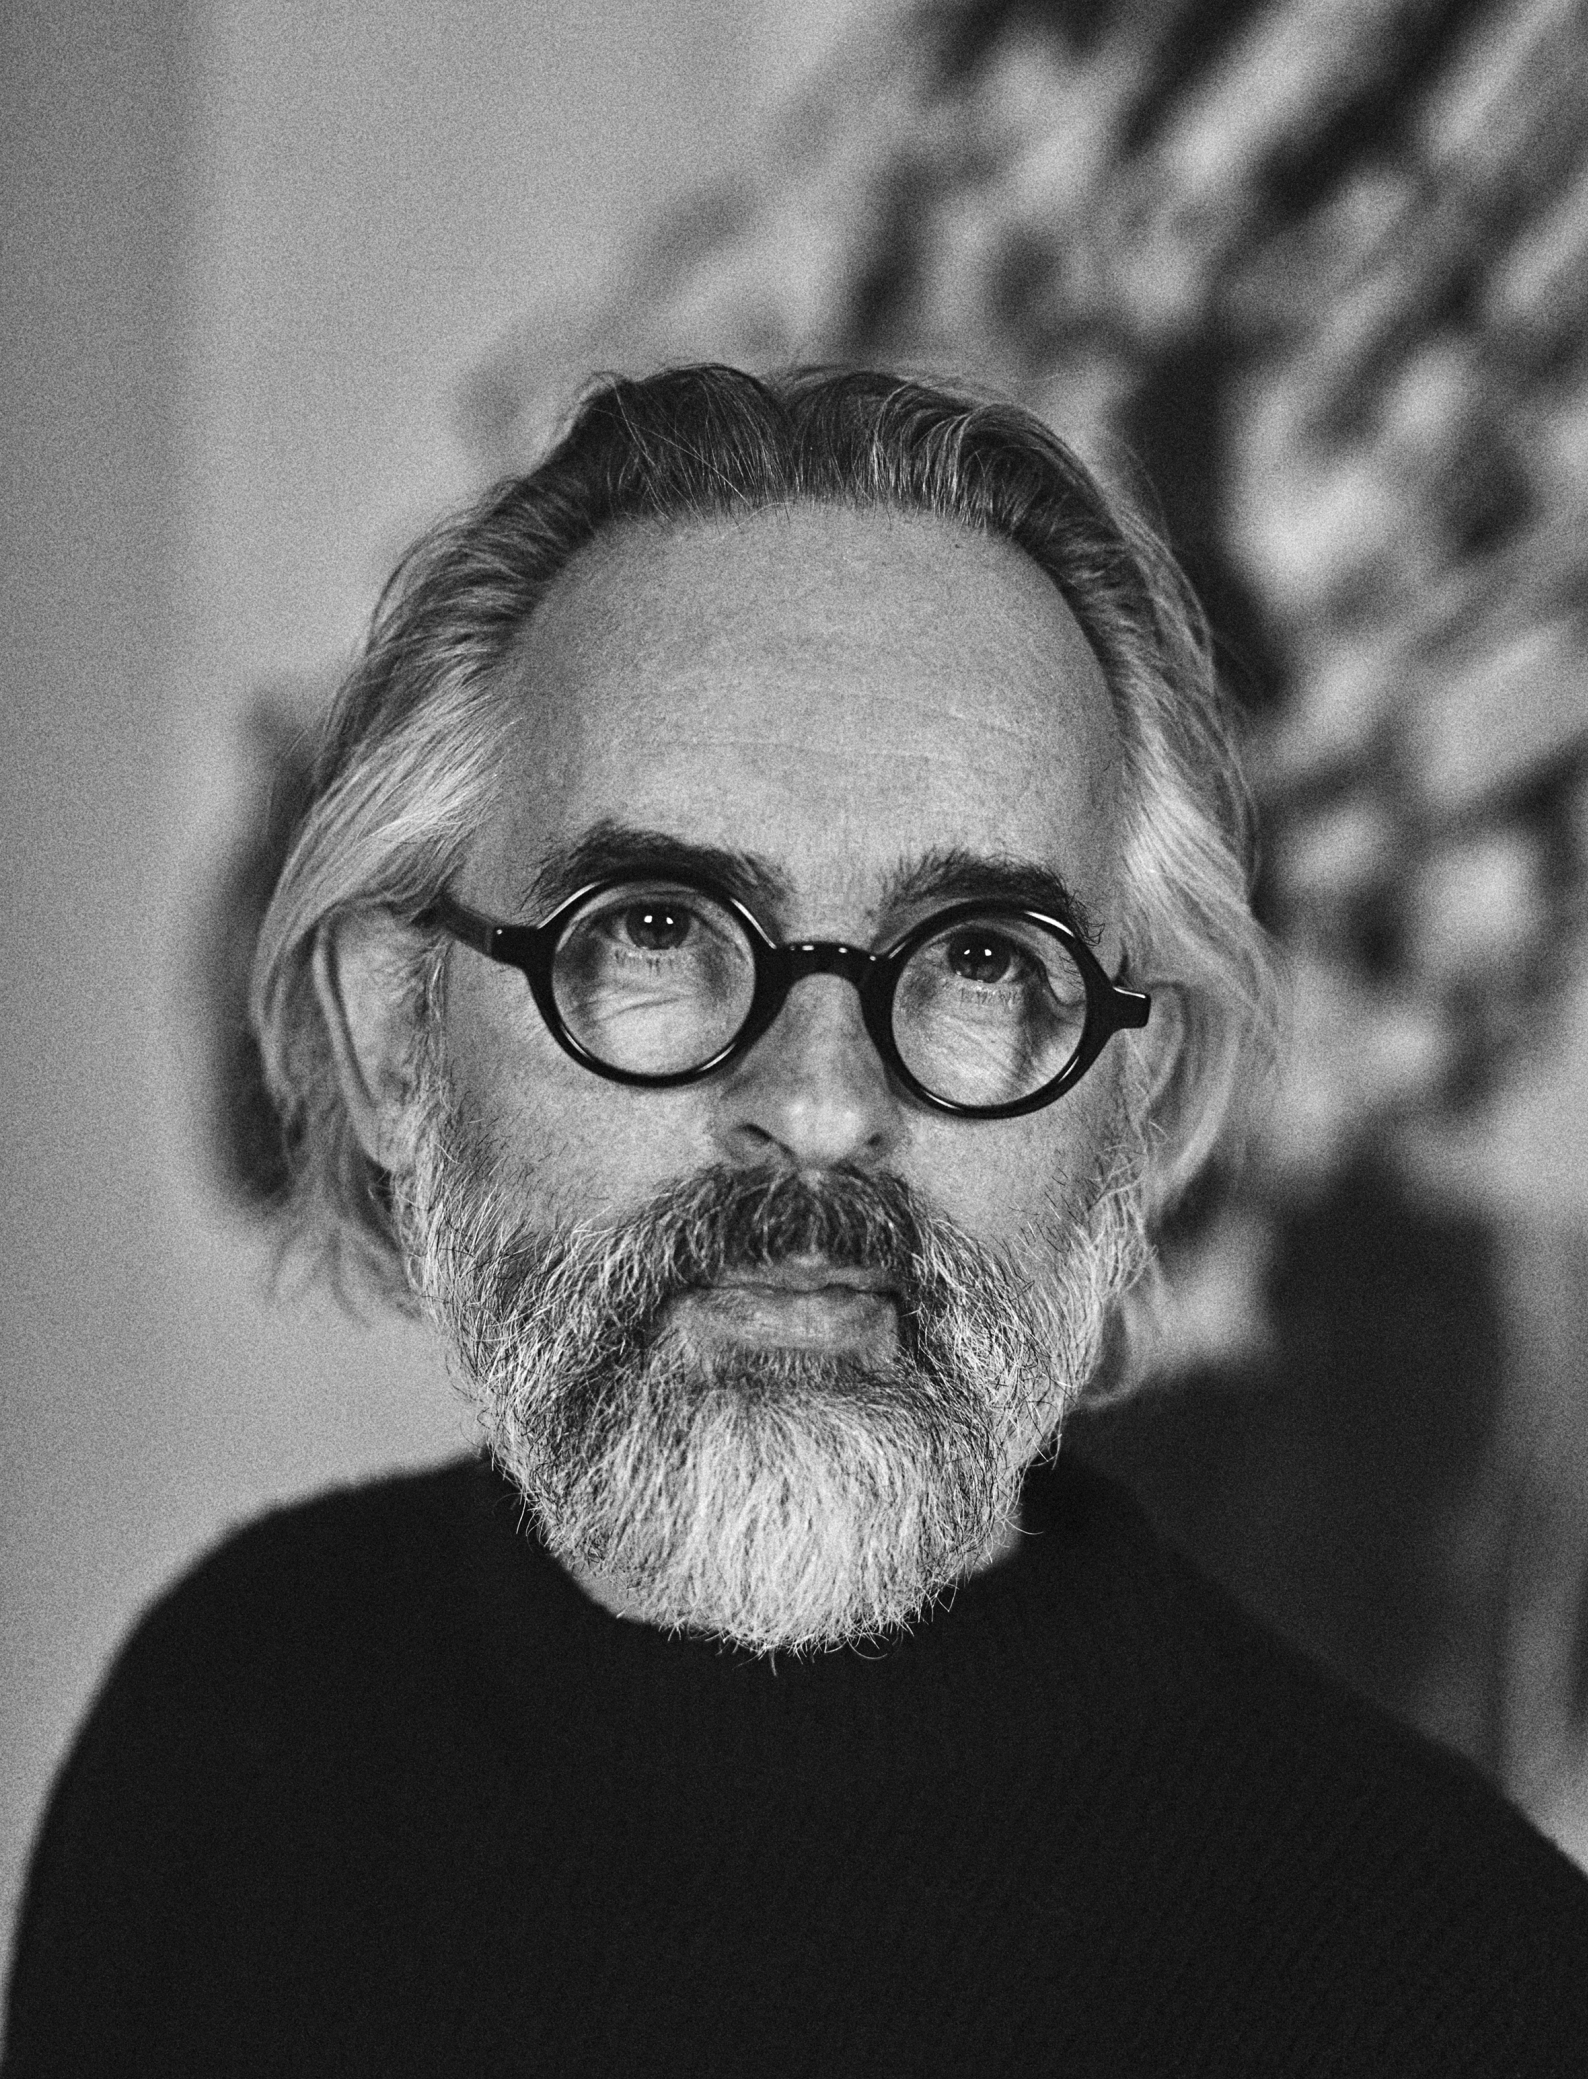

Slipcover on seat, back and cushions.

Place the sofa bed against a wall, convert the sofa bed into the bed position, place the back cushions up against the wall and lounge comfortably.

Innovation Living™ is a Danish furniture company built on the proud Danish tradition of furniture design. We believe that form and function must go hand in hand to create innovative durable designs for everyday use.

We have dedicated ourselves to the design and development of multifunctional sofa beds, and today we are proud to be able to call Innovation Living™ an internationally renowned sofa bed specialist.

**Revivus has been designed to expand your living space in a sustainable way.**

“Minimizing consumption is the most simple and effective way to limit global pollution.

As consumers, we must prioritize buying products that we intend to keep for a long period.

As designers and manufacturers we must develop and produce products designed for long life cycles, including sustainable materials and with recycling in mind.

Revivus has been designed to meet this challenge.”

**Per Weiss**  
Chief Design Officer

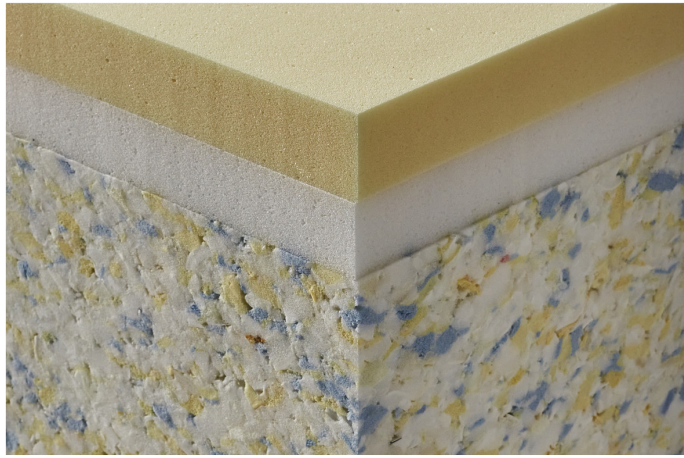

**Flat pack**

Flat pack is the core of our DNA and has been an Innovation Living signature feature for more than 30 years. Flat pack means minimized volume during transport and thus minimal CO2 emissions. At the same time, the flat pack design creates the opportunity to renew the individual components of the design if they are worn out or damaged.

**The frame**

To provide maximum durability, the frame is made of a strong and durable metal construction, and all individual parts can be renewed in case of damage. All metal parts are powder coated in recycled powder. Apart from for easily removed plastic fittings the frame is a 100% metal construction, optimized for recycling.

**The mattress**

The base of the mattress is made of environmentally friendly bonded foam. Bonded foam is made from quality foam residues that are granulated and remoulded. At Innovation Living we have produced and used bonded foam in our mattresses since 1995. The top of the mattress is made of 2 different layers of soft OEKO-TEX certified foam.

**The mattress covers**

The mattresses inner covers are made from excess fabric, and to ensure easy recycling, it is constructed without zippers and the mattress is attached to the frame with a ribbon made of fabric scraps. The mattress can easily be renewed when needed.

**The cushions**

The inner covers of the cushions are made from excess textile and the cushion filling is made from OEKO-TEX certified recycled fiberfill. The covers are made without zipper for easy recycling.

**The slipcovers**

Revivus is equipped with washable slipcovers which make it very easy to maintain. The covers can be renewed when needed. The covers are made without zippers for easy recycling.

**The Vivus fabric**

The Vivus fabric is made from recycled plastic bottles. The Vivus fabric has a minimalist Nordic look, and a very soft and welcoming surface.

Vivus is available in 4 colours.
